

TIME® 5330

PORTABLE HARDNESS TESTER

Features

- New design, ultra-thin Leeb hardness tester
- 4.3 inch AMOLED screen, 480×272 dot matrix, 24 bits true color display
- Menu and short-key operation
- With RS232 and USB interface
- Identify the impact direction automatically
- 7 kinds of impact device can be equipped, when changing, there is no need to recalibrate
- Can store 2000 groups data
- Data transfer to PC
- With operation tips on the each operation menu
- When D/DC impact is integrated to test the steel, you can read HB value directly

Technical Specification

Measuring range	(170~960)HLD see page 11
Measuring direction	360°
Hardness scales	HL, HB, HRA,HRB,HRC,HV,HS
Display	4.3 inch AMOLED screen, 480×272 dot matrix, 24 bits true color display
Data storage	2000 groups
Upper and Lower limits setting	(170~960)HLD
Working voltage	3.7V
Charging time	Approx 6 hours
Power	12V/500mA
Continuous working time	Approx 12 hours
Interface	RS232 and USB
