

Vibration Tester TV310/320

Features:

TV310 is equipped with low sensitivity probe, suitable for testing strong vibration signal

TV320 is equipped with high sensitivity probe, suitable for testing weak vibration signal

Two display modes: digital value mode and spectrum mode

Large memory function: 100 × 100 measured results (100 testing points, 100 data can be stored in each testing point) ; 100 Spectrum charts

Spectrum chart can display in real time

Easy diagnosis: alarm is sounded when vibration go over limit set, and get into spectrum mode

Testing results and spectrum chart can be printed out when connected to printer

300 × 200 matrix LCD display with backlight

Compared with TV300, the testing result of TV310/320 is more accurate and stable especially in low frequency
